*Comprehensive, automated robotic storage & retrieval for retail pharmacies*

- Fits into existing pharmacy workflow patterns and floor plans
- Automates daily put away process
- Less fill labor
- Increased inventory turns with less on hand inventory
- Virtually eliminates waste
- Elimination of theft and diversion
- Returns floor space to retail
- Secure, random order storage and retrieval of all stock bottles, including narcotics
- Accurate precription filling
- Remote Stock Management— includes all items in inventory, even if they're in the refrigerator
- Real-time accuracy to the pill or package (minimizes manual auditing)
- Real-time tracking of every operator interaction. Built-in scale for automatic inventory verification with discrepancy alarm.
- Expiration date and lot number tracking
- Biometric login required for medication access
- Includes double locks
- Utilizes EyeCon™ automated pill counter (optional)

The RxSafe 1800™ represents an evolutionary leap in the scope of robotic pharmacy automation technology. Rather than simply automating fast-moving drugs the RxSafe 1800 provides secure robotic storage and retrieval for the entire inventory of a retail pharmacy.

RxSafe technology automatically and accurately tracks all drugs in the pharmacy down to the pill or package, while greatly enhancing pharmacy efficiency. Since all drugs are stored in native packaging, there is no need for pharmacy staff to spend time manually restocking dispensing cells. The remote stock management feature manages all the inventory and filling, even if it's in the refrigerator.

Specifications for RxSafe 1800™ System (single tower)

- Dimensions — W=25" L=102" H=95"
- Weight — 700 lbs. per RxSafe 1800™ tower
- Capacity — Up to 1800 stock bottles per tower
- Script Fill Rate — Up to 100 scripts filled per hour with single operator
- Communications — Ethernet connection to controller
- Internal Temperature/Humidity — Same as pharmacy space
- Internal Cleanliness — HEPA filter, positive pressure
- Peripherals/Workstation — Touch screen monitor, biometric fingerprint reader, integrated barcode scanner, barcode label printer, wireless sequencing scanner, keyboard, mouse, automated serial number tag feeder, EyeCon™ automated tablet counter (optional)
- Robotics Motion Controller — Proprietary RxSafe motion control and logic
- Software — Proprietary RxSafe software and firmware
Specifications for RxSafe Controller

- Computer — Industrial quality with 2x500GB hard drives
- Data Security — RAID 1 onboard with full encryption
- Operating System — Microsoft Windows 7
- Database — Microsoft SQL Server
- Power — 110 volt A/C, 10 amp
- Uninterruptable Power Supply — 1500 VA, 1 hour "power-out" run time

RxSafe Field Performance Data

Cost Reduction

30% less on-hand inventory
19% fewer FTE hours
33% less pharmacy floor space required
Avoids waste due to expired drugs
100% accurate CII audit results
Millions of prescriptions filled without error

Custom Pharmacy Layout Services

Workflow Optimization

Integrates RxSafe automation into existing pharmacy space
