V1000 Series

The V1000 Universal Surgical Table

With more than 20 years of experience, the designer behind the creation of the V1000 Series surgical Tables has struck the balance between **ADVANCED TECHNOLOGY** and **COST EFFECTIVENESS**, at the same time, pushing to be ever more **VERSATILE, SAFE, RELIABLE, DURABLE, EASY TO USE**, and compatible with **INNOVATIVE IMAGING TECHNOLOGY**.

Versatility

- The V1000 table is designed for all surgical procedures
- four section table top contours to all patient postures
 - leg extension can be quickly removed for perineal access
 - small and slim base enhances C-arm and surgical team access
 - radiolucent kidney elevator enhances lateral procedures
 - auto level button brings the patient back to level
 - slick table design enables easy cleaning
 - lightweight table is easy to move

Safety

- V1000 tables will support patients as heavy as:
- 1,000lb (454kg) with full patient posturing
 - sensors are used to prevent table section conflict
 - short leg section could be raised to prevent patient from slipping down in some surgical procedures

Imaging

- V1000 table provides a great amount of imaging area:
- outstanding 14.4" (366 mm) imaging window width
 - outstanding longitudinal side provides up to optimal imaging window length of 51.5" (1307 mm)

Durability and Reliability

V1000 table comes standard with dual power system, letting the table to be used by either electric or battery power. Both hand pendant and table base have power indicator. V1000 tables also have manual override control system.

Ease of Use

The simple and clever layout of hand pendant's keypad allows the user to intuitively control all aspect of operation. The self-diagnostic feature allows the technician to know right the way where the problem is, thus keeping the table's down time to its minimum.

Cost Effectiveness

The V1000 table is versatile and compatible with many existing accessories, providing enormous cost saving. The reliability and durability helps lower maintenance cost.

Function Model	Tabletop Sliding	Kidney Elevator	Foot Pump
V1000	NA	NA	NA
V1000K	NA	✓	NA
V1000S	✓	NA	NA
V1000SK	✓	✓	NA
V1000SKP	✓	✓	✓

Efficient Lock Features

Quick and easy removal of leg extension for maximum patient access

Short Leg Section

Raise up to prevent patient from slipping off the table in some positions

Hand Pendant Clip

Easy on-off clip prevents hand pendant from falling onto the floor

Integrated Manual Override System

Easy access to foot pedal and override control system

Easy-To-Read Indicators

Continuous battery level status

V1000 Table: Versatile, Easy to Use and Innovative

Radiolucent kidney elevator enhances lateral procedures

Maximizing C-arm access with outstanding 12.2" (310 mm) longitudinal slide and compact mechanism

Smooth head section adjustment

Removable leg extension (or articulate down to 105°)

Patient Weight Capacity: 1,000 lb (454 kg) with full patient posturing

Intelligent floor lock system with auto floor leveling mechanism prevents wobbling of table base

Compact base maximized foot room

Easy-to-Use Hand Pendant

The hand pendant is ergonomically designed with easy-to-read icons. The "Flex", "Reflex" and "Level" functions enable positioning the patient quickly and safely.

Limit Sensors

V1000 table utilizes advanced sensory technology to prevent sectional conflict.

Backlit Keypad Helps to Operate in the Dark

V1000 Tables Imaging Area (IA) Coverage

Models V1000/V1000K

(Normal orientation)

(Reverse orientation)

Models V1000S/ V1000SK/V1000SKP

(Normal orientation sliding to head end)

(Normal orientation sliding to leg end)

(Reverse orientation sliding to head end)

(Reverse orientation sliding to leg end)

Note: 14.4" (366 mm) imaging window width for all tables.

Parts Identification

1. Detachable Head Section
2. Back Section
3. Kidney Elevator
4. Seat Section
5. Leg Section
6. Detachable Leg Extension
7. Side Rail
8. Thumbscrews
9. Base Penal with Override Control
10. Central Column
11. Table Base
12. Ratchet Wrench (for kidney elevator)

Range of Table Movements

Height: 26in to 48in (66cm to 122cm)

Sliding: 12.2in (31cm)

Lateral Tilt: 20° from horizontal.

Trendelenburg: 30° from horizontal.

Reverse Trendelenburg: 30° form horizontal.

Back Section: 80°up or 50°down from horizontal.

Leg Section: 80°up or 105°down from horizontal.

Head Section: 90°up or 90°down from horizontal.

Kidney Bar Elevation: 0 ~4.7in (12cm) up from tabletop.

Flex: 25°down maximum from horizontal for both Back and Seat sections.

Note:

Flex in REVERSE patient orientation: Back down 30° maximum and seat down 30° maximum from horizontal.

Reflex: 30°up maximum from horizontal for both Back and Seat sections.

Note:

Reflex in REVERSE patient orientation: Back up 30°maximum with seat up 30°maximum from horizontal.
